

**Think globally,
act locally!**

What oils and fats are in your kitchen?

- Used deep frying oil,
- expired or unusable edible fat

➔ Öli cares about them all!

Under no circumstances should plant-oil or kitchen fat be disposed of into the kitchen sink or into the toilet. Fat and oil are blocking the sewer pipes and lead to problems in the waste water treatment plants. Blocked sewers, odour annoyance and soiling of the sewer tunnels are the result. This is cost intensive for Customers and the municipality.

Öli is coming to Parsberg!

The modern and innovative collecting- and recycling system is soon starting in your region.

From now on private households may dispose of their deep frying oils free of charge and eco-friendly in swap-buckets.

Find more Information:
www.berndt-gmbh.de

Ölis content is the eco friendly alternative to Palm-Oil in producing of bio-diesel

the following may go into the öli buckets
